

## Vacuum Pump V-300 / V-600

### Technical data sheet

The Vacuum Pump V-300 and the Vacuum Pump V-600 are chemically resistant PTFE diaphragm pumps. The speed-controlled operation in conjunction with the Interface I-300 / I-300 Pro results in economical operation and very low noise emission. Thanks to the transparent front panel, contaminants are easily visible. It is optimally suited to work with the I-300 / I-300 Pro and R-300.

## Vacuum Pump V-300 / V-600

Recommended solution with the Vacuum Pump V-300 in combination with the Rotavapor® R-300, the Interface I-300 / I-300 Pro and the Recirculating Chiller F-308 can be found in the System brochure.

All accessories and connections are included for out of the box usage.

## Special features

### Vacuum Pump

#### V-300 / V-600

Firmware update	With the BUCHI Monitor App and BUCHI Bluetooth Dongle, firmware updates can be easily done by the user at no costs.
Inspection window	A large glass window at front side Allows to observe the two pump heads and membranes for eventual dirt particles
Power saving mode (without I-300 / I-300 Pro)	Pump automatically switches to power saving mode after a given operation time Reduces power consumption while maintaining same terminal vacuum
Level sensor (in combination with Interface I-300 / I-300 Pro only)	Warns of overflow into receiving flask of condenser/secondary condenser When solvents reaches a certain level, a warning pops up at interface and is sent to smartphone/tablet
Control two Rotavapor® systems in parallel	Operate two systems (in combination with 2 Interface I-300 / I-300 Pro only) Allows an upgrade to control two vacuum sources with two Rotavapor® systems simultaneously

## Explanation of terms

speed controlled	Vacuum pump is turned on/off as well as speed controlled via interface/vacuum controller.
on/off	Vacuum pump is automatically turned on/off via interface/vacuum controller

A VacuBox is included when ordering Rotavapor® R-300 with an Interface I-300 or Interface I-300 Pro compatibility pack.

## Description of function

The diaphragm pump is a positive displacement pump that uses a combination of the reciprocating action of a PTFE diaphragm and non-return check valves. The eccentric module lets the diaphragm move strictly axial which leads to an increased service life.

## Energy saving mode

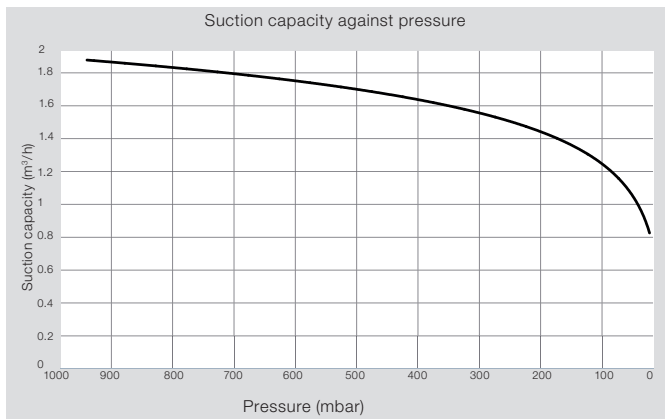

This power saving mode is automatically activated in unregulated operation (as a standalone, without an Interface I-300 or I-300 Pro), hence the pump does not work at its full capacity. The energy saving mode is activated after 1 hour of operation, where the pump works at 80 %. After 2 hours, it reduces to 50 %. In the energy saving mode the pump consumes less electrical power and works under reduced stress, accordingly, the overall maintenance costs will be reduced over the lifetime of the pump.

## Performance characteristics

The V-300 and V-600 have a good suction capacity also at a low pressure. The graphs in the top row show suction capacity against pressure. The graphs in the bottom row show the evacuation time of a laboratory evaporator (left side) and an industrial evaporator (right side).

Upgrades

Upgrade the Vacuum Pump V-300 / V-600 to a speed controlled vacuum source

The Vacuum Pump V-300 / V-600 can easily be upgraded to a controlled vacuum source by adding the Interface I-300 / I-300 Pro (incl. VacuBox and Wouloff bottle).

Upgrade the Vacuum Pump V-300 / V-600 to operate with 2 Rotavapor® systems

The Vacuum Pump V-300 / V-600 can easily be upgraded to work with two vacuum loads via Interface I-300 / I-300 Pro simultaneously (on/off communication, not speed controlled).
